Platform glossary and functions

Operational readiness / JTBD / ontology-aligned copy

2026-08-20 / live tip 8ae1fc7

Daily work lives in Studio Web. Desk is infrastructure. Money is Sales Invoice, Purchase Invoice, and Payment Entry. There is no second studio ledger.

1. Operational readiness

Verdict: Operational for a staffed principal and team. Not fully owner-share ready until Wave A proofs pass (15-minute path, Viewer write 403, Pack guest).

Question	Answer
Run the studio week without Desk?	Mostly yes for job, money, people, capacity, snags
Unaided 15-minute owner path?	Not proven yet
Viewer fail-closed on writes?	In code yes; live smoke not logged
Second money ledger?	No

2. Owner jobs × surfaces × SSOT

Owner job	Studio	SSOT	Status
Decide today	Home action list	Cockpit + SI money	Live
Win work	Pipeline	Lead / Opportunity	Live
Open a job	Projects	Project + Job Order	Live
Staff a job	People tab	lead_architect + Team Member	Live
Assign work	Work	Task._assign	Live
Talk on the job	Activity	Studio Activity	Live
Invoice / collect / pay	Money · Payments · Finance	SI / PI / PE	Live
Overhead	Finance Overhead	PI empty project	Live
Capacity	Capacity	Job scale × share	Live
Snags	Site / project panel	Issue	Live
Print design / FY / payroll create	Desk support	ERPNext setup	Desk

3. Production waves

Wave	Goal	Done-when
A Proof	Owner-share	15-min PASS · Viewer 403 · Pack guest PASS
B Site	Delivery depth	Spec in/out then build drawing/DLP/RFQ
C Polish	Usability	Phone nav · Work by project · expense claim UI
D Desk honesty	Setup boundary	DESK-GAPS marked support-only
E Agent	Laptop door	Named-user token · mcp_studio_agent

4. Glossary

Say this	Means	In the system
Job	Live delivery project	Project
Job Order	Human number YYMM-NNNN	studio_project_code
Client	Who pays and gets the pack	Customer
Lead (enquiry)	Not yet a job	Lead
Lead (person)	Owns the job	lead_architect
Support	Other people on job or task	Team Member / _assign
Work	Delivery tasks	Task
People	Who is on this job	People tab
Activity	Job thread	Studio Activity
Money	Job invoices and bills	SI + PI
Payments	Cash in and out	Payment Entry
Overhead	Studio cost, no job	PI project empty
Capacity	This week load	Job scale × share
Snag	Site issue	Issue
Variation	Scope change	Variation flow
Pack	Client-visible files	client_visible
Viewer	Read-only Studio user	persist deny

5. Project tab copy

Tab	Owner sentence
Overview	Job at a glance: status, next date, links
People	Who is on this job. One row per person
Activity	Job thread. Not the ledger
Money	Job value, invoices, bills (VAT Net)
Payments	Collected and paid on this job
Docs	Delivery checklist and evidence links (not the ledger)
Variations	Approve scope change here

6. Finance tab copy

Tab	Owner sentence
Accounts receivable	Client invoices waiting to collect
Accounts payable	Supplier bills still to pay

Tab	Owner sentence
Payments	Cash in and out allocated to invoices
Reports	Totals and VAT Net. Not a second ledger
Statement	One client's invoices and receipts
Overhead	Studio costs not billed to a job
Monthly costs	This month salaries (read) and JE expenses
Ledger	GL lines from invoices and payments (read)

7. Write paths (one writer each)

Function	Writer	Notes
Record Activity	record_studio_activity	Mentions before save
Create task	create_studio_task	Same writer everywhere
Task people	set_task_assignees	Lead index 0
Job people	set_project_people / team upsert	Lead + Team Member
Job scale	Capacity patch	studio_job_scale
Client invoice	Sales Invoice	Money / AR
Supplier bill	Purchase Invoice	Job PI needs project
Overhead	create_studio_overhead	Empty project PI
Payment	Payment Entry	Allocate to SI/PI
Snag	Issue	Site + project
Viewer block	deny_studio_viewer_write	Before every write

8. UI copy rules

- Prefer studio words: Job, Client, Lead, Work, Money, Pack.
- One sentence under each Project and Finance tab.
- Empty states say the next action, not No data.
- Never train owners to Desk for a closed DESK-GAPS row.
- Never invent a Home money figure that is not SI-derived.
- Grist/Rowy inspire clear tables and roles; do not fork their stacks.
